EUPHORIA AGRO MULCH

RIGHT SOLUTION FOR YOUR PLANTS

Higher Yield
and Income

No Light
Transmission

Enhances
White Roots

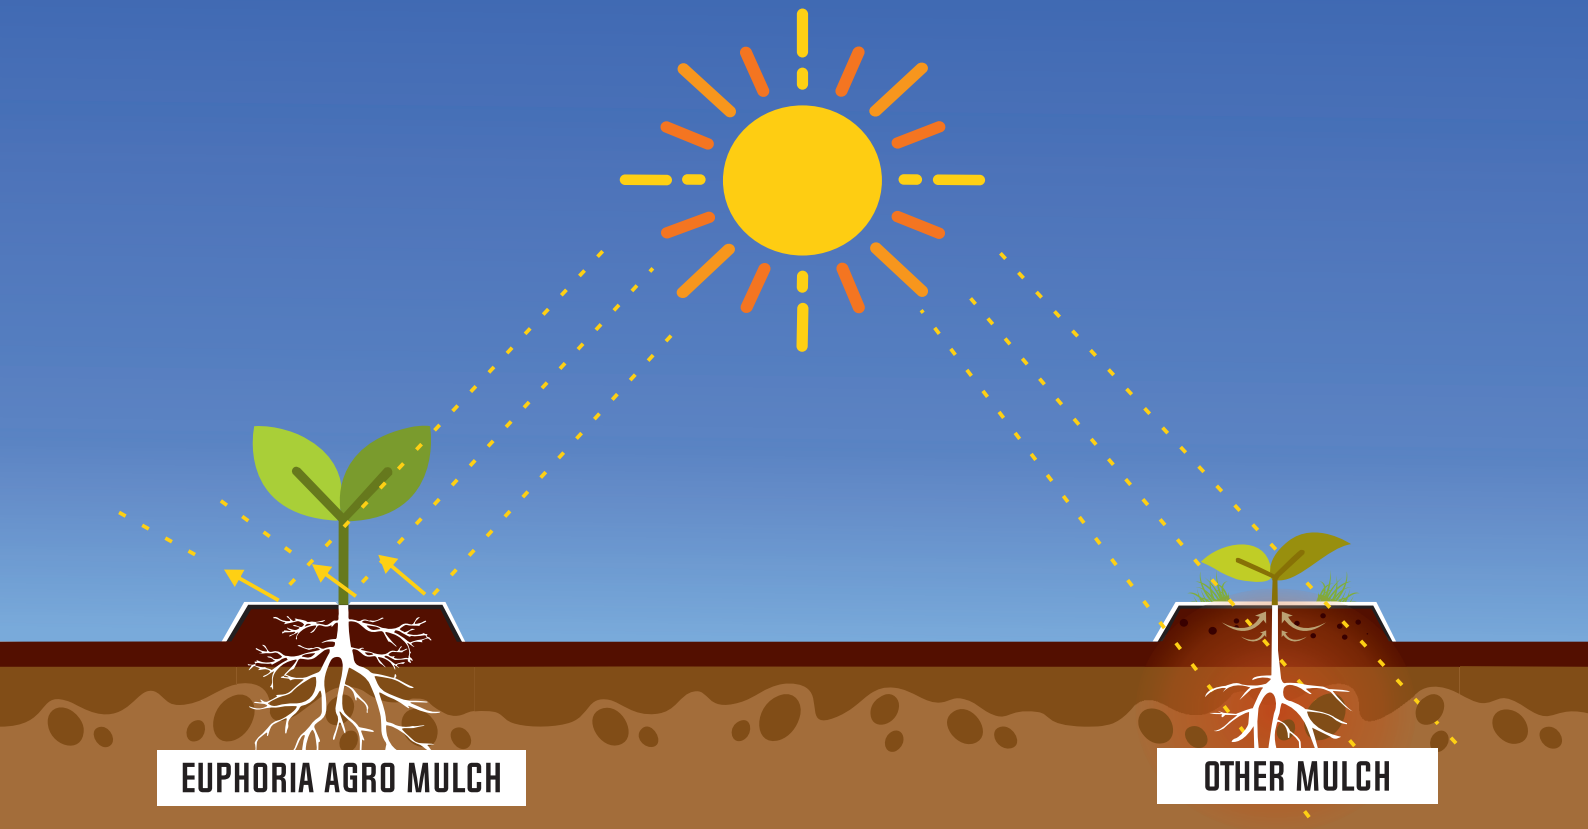

Higher Mechanical
Strength

Better
Microclimate

UV
Stabilization

EUPHORIA AGRO MULCH

OTHER MULCH

- MORE REFLECTED PHOTO ACTIVE LIGHT RADIATION (PAR) TO PLANTS CANOPY
- NO LIGHT TRANSMISSION OF PAR & INFRARED RADIATION TO ROOTS
- BETTER WHITE ROOT DEVELOPMENT UNDER MULCH DUE TO DARKNESS
- NO SALT ACCUMULATION IN THE ROOT ZONE DUE TO WET SOIL
- BETTER NUTRIENT UPTAKE
- NO WEED GROWTH UNDER THIS MULCH
- STRONGER PLANT AND HIGHER YIELD

- ALLOWS PAR & IR TRANSMISSION THROUGH MULCH
- PAR ALLOWS WEED GROWTH UNDER SUCH MULCH
- IR RAISES ROOT ZONE AND AIR TEMPERATURE UNDER MULCH
- HOT AIR ESCAPES THROUGH THE PLANTING HOLE RESULTING IN BURNING OF PLANT
- MORE SALT ACCUMULATION IN THE ROOT ZONE
- DISINTEGRATES IN THE FIELD AND EFFECTS SOIL CONDITION
- POOR YIELD, FINANCIAL LOSS

NO LIGHT, MULCH RIGHT

AGRICULTURE MULCH FILM

Mulch films are used to modify soil temperature, limit weed growth, prevent moisture loss, and improve crop yield as well as precocity. Because of their thickness, use of pigments and their exposure to high solar irradiation, mulch films require proper light and thermal stabilizers with intermediate chemical resistance.

Mulching is a technique of adding a layer to the surface of the soil around the plant with plastic film to conserve the soil moisture that suppress weeds growth, regulate soil temperature and prevent water loss through evaporation. Mulching Film is made of High Strength LLDPE and LDPE Material. Presently different Color Plastic Film used as Mulches such as black-black, Silver - Black, Red -black, Yellow - Black & White -black.

Block sunlight and prevent weed seed germination without chemicals. Protect soil from water loss due to evaporation. Good for water conservation. Increased yield due to low pest attack.

SPECIFICATIONS OF MULCH FILM

Thickness	Life	Width Available	Colors Available
15 Micron- 20 Micron	Single Season Crop	600 MM to 1800 MM	Transparent, Black, White, Silver + Black, Red or as per customers requirement
20 Micron- 30 Micron	2 or 3 Season Crops	600 MM to 1800 MM	Transparent, Black, White, Silver + Black, Red or as per customers requirement
50 Micron Onwards	Orchards for longer life	600 MM to 1800 MM	Transparent, Black, White, Silver + Black, Red or as per customers requirement

MULCHING PROCESS: Mulching is a process of covering soil and forming a protective layer around the plant from natural disaster and unwanted Weeds. Also Mulch Film prevents direct evaporation of soil water which results in better root development.

HIGH QUALITY MULCH FILM: Euphoria pack black mulch does not allow any kind of light transfer which results in conserving moisture, controlling the unwanted weeds and better crop yield. Our mulch is suitable for almost every crop, reflects 27% off the light to the fruits and plant.

Black/Silver and Black/White Films

These three-layered films are silver or white on the side facing up and black on the side facing down. The silver or white color reflects radiation to prevent the overheating of seedlings, plants and fruit, enhances photosynthesis and repels pests; and the black color prevents the penetration of light and reduces the germination of weeds. These films are recommended for vegetables, flowers and orchards with single row layouts or for the entire width of greenhouse gables.

Brown/Silver Films

These three-layered films are silver on the side facing up and brown on the side facing down. The silver color reflects radiation to prevent the overheating of seedlings, plants and fruit, enhances photosynthesis and repels pests; and the brown color reduces radiation transmission and weed germination.

Black Films

Black films absorb and block radiation to suppress weed germination. As they absorb radiation, they warm up and heat the soil, and during hot seasons, may overheat result in burning, seedlings to collapse and hyperthermia in fruit.

With our focus to benefit the farmers in improving quality of crop and yield by using of mulching film, we produce multi-layer stabilized plastic mulching films of utmost quality.
